## DROP BOLT

### Installation Tips

1. Before installing, hold the Drop Bolt where you intend to install it, the bracket should be fitted to a strong member of the structure.
2. With the Bolt in the UP position, swing the gate open and closed checking that the Bolt clears the ground.
3. Ensure that the Bolt has sufficient drop to secure the gate/door.
4. Mark the position of the bracket holes and drill pilot holes using 3.5mm (9/64") drill. Fix bracket with screws provided.
5. Lower Bolt mark ground, Drill hole in ground.
