

QUALITY HARDWARE

## GATE LATCH

### Installation Tips

1. Before installing, hold the latch and striker where you intend to install them.
2. The latch and striker should be fitted to a strong member of the structure.
3. Check that the latch and striker are at the right angles to the shut line.
4. Mark hole positions, drill pilot holes using 2.5mm drill.
5. For extra security, fit a padlock to latch.
6. If required, drill holes through post above latch and feed release cord through hole.
